Department of Neuro Surge
98, Rustom Bagh, Airport Road, BANGALORE-560 0

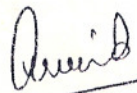

Date: July 25th, 1996.

TO WHOMSOEVER IT MAY CONCERN

Murli Menon aged 28 years, with a history of road traffic accident was presented for treatment of haematoma in fronto-parietal region on 1st January 1995 and was discharged on 14th January 1995.

But, Murli was again presented on 18th February, 1995 with history of sudden onset of generalised tonic, cyclonic seizures. There was extensive paralysis of all muscle groups of the left hand side. The paralytic effect resulted in complete immobility of both left limbs. Patient underwent an emergency craniotomy and evacuation of haematoma was carried out on 19th February, 1995.

As on July 25th 1995, Murli has recovered the full use of both his left limbs, without any defect or any effect. This complete recovery has only been possible because of Murli's never say die attitude, strong will power, tough determination and a tremendous desire to succeed inspite of several odds. I give full credit to Murli for orchestrating his total recovery enabling him to become as normal as before the accident.
